It's bigger than Mr. Bobo's booty! Now THAT's a big deal!

Cute little game with lots of personality.

My young children enjoy it as well (even though they don't get it, of course).

It's very short (it can be beat in less than an hour), so some people might be disappointed about that.. I've been following this game since about day 0 from Twitter. The developer was passionate about it all these years and so far, I'm loving it. BTW, the music is awesome.. I met many new friends and received monster love. Modern art kind of experience that make you think about life.. This game is short and sweet with some interesting characters and dialog. I recommend it for anyone that lacks monster friends in their life!. Short, but oozing with charm and personality!. Such a cute and special game!^^

It had quite the philosophical and melancholic undertone to it, which i didn't expect and really liked.

I played through it once, and already felt like there is alot more to discover and i am impressed by how much flavor comes through the dialogues and text boxes. It really feels like they all have different and somewhat conflicting personalities.

A warm and genuine experience that leaves you with a lingering feeling. =). A wonderful healing game that I played with my 3-yo. They really enjoyed it and wanted to play it again and again and again. A scene near the end brought me to tears. It really is a wholesome experience, but in a constructive, confrontative way.

I recommend it wholeheartedly.

Super enjoyed this game! It's very sweet and enjoyable. The characters are interesting and I found myself wanting to get to know them more as the game progressed. I often get sick of stereotypical characters in games but none of them in this one were that. All had their own life and personality and was quite refreshing to discover how they reacted to the events going around them.

It's not a long game but for 5 bucks it's really worth it for a nice relaxing short experience.. It's more of an interactive digital experience than say a conventional game ... and I like it.

After my first playthrough, I suspect there's a lot more to the game than what I had experienced as I do not recall seeing some of the scenes depicted in the Steam Store page of this title.

BTW, that hippo with no arms is kinda pervy. This is the first game I bought on steam, and it certainly did not disappoint. The colorful and vibrant artwork, straightforward gameplay, hilarious characters with positive messages make it easy for me to recommend this game to anyone who's down to get down with some monsters. Also, make sure you play through the game a few times to meet all of the monsters and see the different ways the story unfolds. You're in for a good time.. I went in not expecting much, and I was surprised to say the least. It's a beautifully charming game with tons of character. This game honestly deserves more attention than it gets. You can tell this game is made with lots of love.

I would 110% recommend this game.. It's both a pleasure to ZOOM through this game as well as take your time to smell the Bobos. As you start to realize how your choices affect the progress and atmosphere of your garden, you begin thinking about what you'd like to try different in your next garden. With an extensive cast of colorful monsters, you're sure to find a new friend every time through.
