About This Game

Stuck in a remote, abandoned town, you must lead five survivors with conflicting motivations, fragile relationships and fiery prejudices to safety from the roving undead. A sophisticated engine generates new survivors, towns and content so every adventure is a different experience, and you can use built-in editors to add yourself and others to the game.

Features

- Deal with the volatile relationships of your survivors by strategically assigning them to tasks, siding with them on difficult decisions or seeding rumours about their past
- The undead aren't the only threat - negotiate, bargain, trade with or fight merciless lynch mobs, zombie hunters and bitten survivors
- Experience a fresh story each time you play as the procedural engine crafts new survivors, towns and content
- Built-in editors make it easy to add yourself and your friends to the game. Create your own survival horror story in your hometown
- Unique diary interface records each action, choice and disaster. Save your heroic story and share it with others

Zafehouse: Diaries is a fresh take on the zombie / survival horror genre. If you're sick of mindless shooters or generic-looking top down affairs that just don't get what the zombie genre is about, this is the game for you.

The game mechanics feels wrong, in-game UI is horrible, game not registering that some tasks\missions are unable to be pursued any further, limitation of actions available....no, it is NOT enjoyable at all!. I tried to like the game, didn't work.

The only interesting thing is the diary that lists everything that has happened to your group. That's about it.

Shallow game, silly survivor interactions, too hard.

You'll have to die and restart over and over until you figure out a way to beat the game. But by that time you'll be too bored.
